AUTHOR INDEX, VOLUME XXXIV

(Page numbers in *italics* refer to discussion participation.)

Adler, G.: see Ballantine, D.
Allen, G., Gee, G., Lanceley, H. A., and Mangaraj, D.: Intermolecular forces and chain flexibility in linear polymers, 349
——: *367*
Allen, P. W.: *250, 394*
Angier, D. J., Ceresa, R. J., and Watson, W. F.: Mastication of rubber. VIII. Preparation of block polymers by mechanical shear of polymer-monomer systems, 699
Atherton, N. M., Melville, H., and Whiffen, D. H.: Electron spin resonance studies of radicals trapped in polymers, 199
——: *207*
Ballantine, D., Glines, A., Adler, G., and Metz, D. J.: Graft copolymerization by pre-irradiation technique, 419
Bamford, C. H., Jenkins, A. D., Symons, M. C. R., and Townsend, M. G.: Trapped radicals in heterogeneous vinyl polymerizations, 181
——, ——, and White, E. F. T.: The kinetics of block and graft copolymerization of acrylonitrile, 271
——: *108, 195, 228*
Banderet, A.: see Kobryner, W.
——: *306, 396*
Bawn, C. E. H., Ledwith, A., and Matthies, P.: The mechanism of polymerization of diazoalkanes catalyzed by boron compounds, 93
——, and Symcox, R.: Polymerization of ethylene by soluble Ziegler catalysts, 139
——: *196*
Beati, E.: see Natta, G.
Bengough, W. I.: *197, 198*
Bensasson, R.: *197*
Berlin, A. A.: On certain trends in the synthesis and practical application of graft copolymers, 371
Bernas, A.: *197, 241*
Bevington, J. C.: *194, 284, 306, 436, 480, 680*
Bex, J. P.: see Smets, G.
Blanchard, A. F., and Wootton, P. M.: Entanglement and other steric effects in crosslinked polymers, 627
Bloomfield, G. F.: *669*
Boyer, R.: *367–369*
Braun, D.: *120*
Breitman, L.: *250*
Bryant, W. M. D.: *369, 595*
Bunn, C. W.: *369*
Burnett, G. M.: *46*
Cantow, M.: see Meyerhoff, G.
Caplan, S. R.: *415*
Ceresa, R. J.: see Angier, D. J.
Chapiro, A.: Synthèse des copolymères greffés à partir des polymères ayant subi l'action des radiations ionisantes. II. Influence des conditions de préirradiation sur la cinétique du greffage sur le polyéthylène, 439
——: Preparation des copolymères greffés du polytetrafluoréthylène (Teflon) par voie radiochimique, *481*
——: *195, 206, 284, 437, 459, 501*
Chapman, C. B., and Valentine, L.: The preparation and properties of grafts of polycaprolactam on vinyl copolymers, 319
Charlesby, A.: *242, 500, 681*
Ciferri, A.: see Flory, P. J.
Colclough, R. O., Gee, G., Higginson, W. C. E., Jackson, J. B., and Litt, M.: The polymerization of epoxides by metal halide catalysts, 171
——: *178*
Cooper, W., Vaughan, G., Miller, S., and Fielden, M.: Graft copolymers from natural rubber latex using visible, ultraviolet, and γ-ray initiation, 651
——: *306, 396, 669*
Dainton, F. S., Seaman, P. H., James, D. G. L., and Eaton, R. S.: The polymerization of acrylonitrile in aqueous solution, 209
——: *227, 228, 241, 306, 668*
Danon, J., Jobard, M., Lautout, M., Magat, M., Michel, M., Riou, M., and Wippler, C.: Sur certaines propriétés des polymères greffés en solution, 517
Danon-Sebban, J.: *438, 667*
Danusso, F.: see Natta, G.
——: *46*
Duck, E. W.: *86*
Eaton, R. S.: Dainton, F. S.
Ebert, P. E., and Price, C. C.: Polyethers. VI. Aluminum alkyls as catalysts for polymerization of propylene oxide, 157
Eirich, F.: *335*
Eppe, R., Fischer, E. W., and Stuart, H. A.: Morphologische Strukturen in Polyäthylenen, Polyamiden und anderen kristallisierenden Hochpolymeren, 721
Fielden, M.: see Cooper, W.
Fischer, E. W.: see Eppe, R.
Flory, P. J., Hoeve, C. A. J., and Ciferri, A.: Influence of bond angle restrictions on polymer elasticity, 337
——: *367*
Frank, H. P.: *307, 549*

Gee, G.: see Allen, G.
——: see Colclough, R. O.
——: *367–369, 529*
Gerrens, H.: *197*
Gilchrist, A.: Kinetic studies on a Ziegler catalyst system, 49
——: *48, 62, 136*
Gilliland, E. R.: see Hoffman, A. S.
Glines, A.: see Ballantine, D.
Goodman, I.: *120, 307, 438, 681*

SUBJECT INDEX, VOLUME XXXIV

Acrylonitrile, copolymerization, kinetics, 271
polymerization, 209
Aluminum, as catalyst for ethylene oxide polymerization, 161
Aluminum alkyls, as catalysts for propylene oxide polymerization, 157
Ammonia, for methacrylonitrile polymerization, 109
Atactic homopolymers, α-olefins, 531
Atactic polymers, nomenclature, 3
Birefringence, and draw ratio of fibers, 761
Block copolymer, α-olefins, 531
Block copolymerization, acrylonitrile, 271
Block polymers, rubber, 699
Borons, as catalysts, 93
Catalysts, aluminum, for ethylene oxide polymerization, 161
borons as, 93
chromium oxide and molybdenum oxide as, 129
for epoxides polymerization, 171
for isotactic polypropylene oxide, 153
for propylene oxide polymerization, 157
Ziegler, in ethylene polymerization, 65, 139
Ziegler, kinetic studies on, 49
Chain flexibility, in linear polymers, 349
Chromium oxide, as catalyst, 129
Crosslinking, by ultraviolet initiation, 671
Crystallization, polyethylene terephthalate, 741
Diazoalkanes, polymerization, 93
Draw ratio, and birefringence of fibers, 761
Elasticity, influence of bond angle restrictions on, 337
Electron spin resonance, of radicals trapped in polymers, 199
Entanglement, crosslinked polymers, 627
Epoxides, polymerization, 171
Ethylene, polymerization with Ziegler catalysts, 65, 139

Ethylene oxide, catalysts for polymerization, 161
Fibers, man-made, draw ratio and birefringence relationship, 761
Gamma-ray initiation, for graft copolymer of natural rubber latex, 651
Graft copolymerization, acrylonitrile, 271
  polyethylene, 439
  by pre-irradiation technique, 419
  styrene to polyethylene, 461
Graft copolymers, application, 371
  natural rubber latex, 651
  polymethyl methacrylate and Hevea rubber, 381
  poly-α-olefin hydroperoxides, 685
  polytetrafluoroethylene, 481
  properties, 517
  synthesis, 287, 371
  vinyl acetate and polyvinyl alcohol, 397
Grafting, by ultraviolet initiation, 671
Halides, metal, as catalysts for epoxides polymerization, 171
Heterogeneous copolymerization, methacrylate esters and methacrylate ion, 251
Heterogeneous polymerization, effect of separating phase on, 243
Heterogeneous vinyl polymerizations, trapped radicals in, 181
Hevea rubber, grafting of polymethyl methacrylate on, 381
Intermolecular forces, in linear polymers, 349
Irradiation, graft copolymerization by, 419
  for graft copolymers of styrene and polyethylene, 461
  for grafts on polyethylene, 439
Isobutene, polymerization, 229
Isotactic homopolymers, α-olefins, 531
Isotactic polymerization, phenyl glycidyl ether, 165
Isotactic polymers, nomenclature, 3
Isotactic polypropylene oxide, catalysts for polymerization, 153
Kinetics, acrylonitrile copolymerization, 271
  α-olefin polymerization, 21
  Ziegler catalysts, 49
Linear polymers, intermolecular forces and chain flexibility in, 349
Lithium, for high polymer formation, 121
  for methacrylonitrile polymerization, 109
Methacrylate esters, copolymerization with methacrylate ion, 251
Methacrylonitrile, polymerization, 109
Methyl methacrylate, polymerization, 229
Molecular weight, polystyrene, 503
Molybdenum oxide, as catalyst, 129
Nomenclature, Italian, 13
  sterically ordered structures, 3
α-Olefin, polymerization, kinetics of, 21
  properties, 531
Organometallic complexes, 121
Phenyl glycidyl ether, isotactic polymerization, 165
Polyamides, structure, 721
Polycaprolactam, grafting on polymethacrylate, 309
  grafting on vinyl copolymers, 319
Polyethers, 153, 157, 161, 165
Polyethylene, graft copolymerization by irradiation, 439
  grafting of styrene on, 461
  orientation, 709
Polyethylene, structure, 551, 569, 721
Polyethylene terephthalate, crystallization, 741
Polymethacrylate, grafting of polycaprolactam on, 309
Polymethylene, 569
Polymethyl methacrylate, grafting on Hevea rubber, 381
Poly-α-olefin hydroperoxides, graft copolymers from, 685
Poly-α-olefins, 129
Polypropylene oxide, isotactic, catalysts for, 153
Polystyrene, molecular weight, 503
Polytetrafluoroethylene, graft copolymers of, 481
  internal friction, 355
Polyvinyl alcohol, graft copolymer with vinyl acetate, 397
Propylene oxide, catalysts for polymerization, 157
Radiation, for polymerization of isobutene and methyl methacrylate, 229
Radicals, electron spin resonance studies of, 199
  in heterogeneous vinyl polymerization, 181
Random copolymers, α-olefins, 531
Rubber, mastication, 699
  natural, graft copolymers from, 651
Stereoblock homopolymers, α-olefins, 531
Steric effects, crosslinked polymers, 627
Styrene, grafting on polyethylene, 461
Titanium, for high polymer formation, 121
Ultraviolet initiation, for crosslinking and grafting, 671
  for graft copolymers of natural rubber latex, 651
Vinyl acetate, graft copolymer with polyvinyl alcohol, 397
Vinyl copolymers, grafting of polycaprolactam on, 319
Vinyl polymerization, radicals in, 181
Viscoelasticity, rubbery polymers, 599
Ziegler catalysts, in ethylene polymerization, 65, 139
  kinetics, 49
